

SIMATS ENGINEERING

ASSESSMENT TOOL 1

COURSE NAME: CSA16 **COURSE CODE:** Data Warehousing and Data Mining

COURSE OUTCOME COVERED

CO1: Design data warehouse architectures with appropriate dimensional models for effective decision support systems. BL1,BL2
Assessment Tool Weightage: 30%

QUESTIONS: 2

Total Marks:50

Annexure A

Technical Presentation

Criteria	Technical Content Accuracy(3)	Problem Identification(2.5)	Use of Tools(2)	Communication(1.5)	Professionalism(1)	Total(10)
Weightage	30%	25%	20%	20%	10%	100%
Q1						
Q2						

Code of Conduct:

I Farah Afrin / 192511434 (Name / Reg No) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment. I understand that any violation of academic integrity rules will result in disciplinary action.

RUBRICS FOR CALCULATION:

Technical Presentation					
Criteria	Weightage	Level 4 – Exemplary	Level 3 – Proficient	Level 2 – Developing	Level 1 – Beginning
Technical Content Accuracy	30	Highly accurate, in-depth, and insightful technical explanation	Technically correct content with adequate depth and clarity	Basic concepts presented with limited accuracy and depth	Content contains major technical errors; concepts poorly understood
Problem Identification	25	Problem rigorously analyzed using appropriate and advanced methods	Problem clearly defined with a logical engineering approach	Problem identified but analysis or methodology is weak	Problem statement unclear or incorrect; no logical approach
Use of Tools	20	Advanced tools, well-analyzed data, and highly effective visuals	Appropriate tools and data used effectively with clear visuals	Limited use of tools and basic data interpretation	Minimal or incorrect use of tools and data; poor visuals
Communication	15	Highly engaging, confident, and audience-focused delivery	Clear, organized, and professional communication	Understandable but lacks clarity, structure, or confidence	Poor organization, unclear speech, ineffective slides
Professionalism	10	Exemplary professionalism, leadership, and ethical awareness	Professional conduct with effective team collaboration	Basic professionalism; uneven team participation	Lacks professionalism; minimal contribution or ethical awareness

Data Warehouse and Mining

Assessment Tool - 1

CSA1603 Datawarehousing and Data Mining

Decision Support System

✕ A Decision Support System (DSS) is a computer-based system that helps managers and decision-makers make better decisions by analysing data and providing useful information.

📡 A DSS collects data from different sources, analyzes it, and presents the results in a meaningful way to support semi-structured and unstructured decision-making.

✕ Example: A supermarket analyzes customer purchase data to decide product stock, pricing, and marketing strategies.

📡 Benefits: Faster decisions • Better analysis • Forecasting • Reduced risk

Main Components of DSS

Role of Data Mining in decision support system

Role of Datawarehousing in decision support system

The infographic features a central light gray circle with the text "Types of Decisions Supported". To the right of the circle is a vertical line with four colored segments: orange at the top, teal in the middle, purple below that, and green at the bottom. Each segment is connected to a callout box. The callout boxes are orange, teal, and purple, corresponding to the first three segments. The orange callout box contains the number "01" and the text "Structured Decisions: Routine and repetitive decisions." The teal callout box contains the number "02" and the text "Semi-Structured Decisions: Partly based on rules and partly on human judgment." The purple callout box contains the number "03" and the text "Unstructured Decisions: Complex decisions requiring experience and judgment." The green segment at the bottom is not connected to a callout box.

Types of Decisions Supported

01

Structured Decisions: Routine and repetitive decisions.

02

Semi-Structured Decisions: Partly based on rules and partly on human judgment.

03

Unstructured Decisions: Complex decisions requiring experience and judgment.

Advantages
